

CrystalView SERIES

This is a **Solid Polycarbonate Sectional Door** made from 4mm Perspex (solid acrylic). The sleek, translucent design offers a modern and sophisticated look, allowing light to filter through while maintaining privacy. This type of door is typically found in contemporary architecture due to its minimalist, high-end appearance.

This **Solid Polycarbonate Door** brings a sophisticated and ultra-modern element to homes that emphasize clean lines, openness, and contemporary design.

This design complements the following home styles:

Modern and Contemporary Homes – The clean lines and sleek, translucent design are perfect for homes with a modern aesthetic that emphasizes simplicity and light.

Minimalist Homes – The solid polycarbonate panels provide a streamlined, unobtrusive look, ideal for homes that prioritize simplicity and functional elegance.

Urban and City Homes – For homes in urban areas, the modern material and sleek design of this door offer a cutting-edge, stylish appearance.

Luxury Homes – The premium look and material of Perspex elevate the design, making it well-suited for luxury homes that focus on modern, high-end finishes.
